

**Crystal Data:** Tetragonal, pseudocubic. *Point Group:*  $\bar{4}, \bar{4}2m$  based on morphology. As short tetragonal prisms with pyramids, sphenoids, and bisphenoids, to 3 mm; fine-grained aggregates, massive. *Twinning:* Penetration twinning on (101) produces pseudocubic triplets; pseudotrigonal contact twins with composition planes (10 $\bar{1}$ ) and (01 $\bar{1}$ ).

**Physical Properties:** *Cleavage:* Distinct on {101}, fair on {110}. *Fracture:* Conchoidal. Hardness =  $\sim 4$  D(meas.) = 2.33(1) D(calc.) = 2.34–2.35 Piezoelectric; fluorescent and phosphorescent red to rose-pink under UV; photochromic, pale colors become pink on exposure to sunlight or X-rays.

**Optical Properties:** Transparent to translucent. *Color:* White, pink, carmine, bluish, greenish; colorless in thin section. *Luster:* Vitreous.

*Optical Class:* Uniaxial (+); anomalously biaxial. *Pleochroism:* Weak violet to weak red-orange.  $\omega = 1.492\text{--}1.496$   $\epsilon = 1.499\text{--}1.502$   $2V(\text{meas.}) = < 10^\circ$

**Cell Data:** *Space Group:*  $I\bar{4}$ .  $a = 8.640(1)$   $c = 8.873(1)$   $Z = 2$

**X-ray Powder Pattern:** Tugtup agtakôrfa, Greenland.

(1) Ilímaussaq intrusion, Greenland. (2) Lovozero massif, Russia. (3) Na<sub>4</sub>AlBeSi<sub>4</sub>O<sub>12</sub>Cl.

**Occurrence:** Replaces chkalovite in hydrothermal veins cutting sodalite syenite and syenite (Ilímaussaq intrusion, Greenland); an alteration product in pegmatites in a differentiated alkalic massif (Lovozero massif, Russia).

**Association:** Albite, analcime, aegirine, natrolite, tetranatrolite, chkalovite, lithian mica, epistolite, niobophyllite, monazite, rhabdophane, gerasimovskite, nenadkevichite, beryllite.

**Distribution:** In Greenland, in the Ilímaussaq intrusion, at Tugtup agtakôrfa, around the Tunugdliarfik Fjord and on the Kangerdluarssuk Plateau; on Qeqertausaq Island; in the Gletscherelv Valley; and on the Kvanefjeld and Taseq Plateaus. From Mts. Sengischorr and Punkaruav, Lovozero massif, Kola Peninsula, Russia. At Mont Saint-Hilaire, Quebec, Canada.

**Name:** For the occurrence at Tugtup agtakôrfa, Greenland.

**Type Material:** University of Copenhagen, Copenhagen, Denmark, 1970.276; The Natural History Museum, London, England, 1967.394.
